# Additional Information

As the drive of past papers is expanding rapidly, here is some additional information about each subject and the overall collection. Also provided are guidelines for compilers to consider when creating their past papers. Happy revising and all the best for your exams…

## People Using the Papers:

- If there are any errors in a past paper, please notify the compiler or QC as soon as possible so that they can be corrected.
- You are **not** required to finish them.
- We recommend printing the entire paper rather than just a portion of it.
- You may ask the compiler to mark the papers if you haven't printed out or checked the mark scheme.

## Watermarks:

- If there are flowers on each page of the paper, the practice paper is made up of fewer than 50 questions.
- If there is a koi fish on each page of the paper, the practice paper is made up of either over or exactly 50 questions.

## Past Paper Peddlers:

- If possible, please volunteer to print out the question paper and the mark scheme for others to use. This is **not** required. Beforehand, you can ask who needs a copy.
- Usually, the past paper compiler will also print and peddle them out.

## Compilers:

- You are **not** to use any format outside of the template provided, unless approved by the folder leader.
- You may add sources, but they are **not required.** However, **do not** add sources like "qp_42_q6_pdf". Use "0580 (P)aper 4 (V)ersion 2 Q6" or something similar that looks quite formal.
- You may mark the papers if people ask you to, if they have not printed out or checked the mark scheme.
- Topical papers **must** be finished at least 2 days before the teacher assigns a topic test.
- Try your best when making the papers. You **must** remove any watermarks from the paper and try to align the questions as much as possible.
- Make the necessary information and the question on the same page for ease of answering when doing the paper.

- You **must** state whether the paper requires a calculator or not at the top of the paper (see template).
- You may add custom questions if they are relevant to the topic. These questions can be made difficult and can require multiple concepts. The mark scheme **must** be realistic and **must** follow a similar style to Cambridge.
- The mark scheme **must** be attached in a folder.
- Folders **must** be created to separate the chapters/topics.
- All past papers **must** be an even number of pages (see template). Mark schemes are excluded (see template).
- All papers **must** be 16.5 centimetres wide (see template).
- A quality controller, Julian or Kimhan, **must** approve the paper.
- If you would like to become a compiler or a quality controller, please let Julian know.
- The grade threshold **must** be added based on the latest IGCSE exam.
- For specimen paper questions, you **must** state it within the question number [e.g. Question 2 (Specimen Paper):]. You **must** also state it in the mark scheme and should be bolded and underlined [e.g. **Specimen Paper Question**].

**Current Compilers For Each Subject:**

- **Mathematics (0580):**
  - Accelerated: Kimhan (QP2)
  - Accelerated: Julian (QP1)
  - Middle Set: Julian
- **Co-ordinated Science (0654):**
  - Physics: Leo
  - Chemistry: Kimhan
  - Biology: Kevin D.
- **Computer Science (0478):** Leo
- **Geography (0460):** Elliot
- **Sociology (0495):** Yoyo
- **Psychology (0266):** Matthieu
- **ICT (0417):** Pauly
- **Additional Mathematics (0606):**
  - Kimhan (QP2)
  - Julian (QP1)

## Mathematics (0580):

- **All** past papers from Chapter 19, in Accelerated, onwards are split into two papers. Paper 2 will include questions from all **extended** versions from 2009 to 2016, whilst Paper 1 will include questions from 2017 to 2025, respectively.
- Past papers for Chapters **1-16 and 18** (for Top Set) are all in **only** one paper. These include questions from all **extended** versions from 2018 onwards.
- There are two past papers for Chapter 17; however, these are split differently. QP1 is from 2019 onwards, whilst QP2 is from 2010-2011.
- Middle Set papers are a combination of questions from 2018 onwards and will consist of only **one** paper.
- These questions are **meant** to be challenging as they combine topics.
- There will **not** be questions from the core exams whatsoever.

## Additional Mathematics (0606):

- Past papers from Chapters 1 and 2 are split into two papers. Paper 2 will include past paper questions from all versions from 2004 to 2016, whilst Paper 1 will include questions from 2017 to 2025 respectively.
- **All** past papers from Chapters 3 onwards are split into two papers. Paper 2 will include past paper questions from all versions from 2011 backwards, whilst Paper 1 will include questions from 2012 - 2018 and 2025 respectively.
- Additional Maths papers will follow a special template, as it is a subject limited people will take.
- These questions will require a lot of critical thinking and reasoning skills.

## Co-ordinated Science (0654):

- **All** past papers within this subject will be available in one paper per topic (or group). These will include questions from all **extended** versions from 2002 onwards.
- These questions are **meant** to be challenging as they combine topics.
- There will **not** be questions from the core exams whatsoever.
- All papers **will** require a calculator.

## Computer Science (0478):

- **Most** past papers within this subject will only come in 1 paper per topic (or group). These will include questions from all versions from 2007 onwards.
- These questions are **meant** to be challenging as they combine topics and information from previous chapters.
- Some chapters **will** include multiple papers due to the large amount of information within the chapter.
- All papers will **not** need a calculator.

- Coding questions will **not** be included.

## Sociology (0495):

- **Most** past papers within this subject will only come in 1 paper per topic (or group). These will include questions from all versions from 2007 onwards.
- These questions are **meant** to be challenging as they combine sub-topics and information from previous sub-topics. You are meant to think critically about your answers.
- Some chapters **will** include multiple papers due to the large amount of information within the chapter.
- The actual question paper will **not** include space to answer the question. Lined paper is provided within the folder.
- Some questions will come from another exam board due to the repetition of a certain style of questions.

## Geography (0460):

- **Most** past papers within this subject will only come in 1 paper per topic (or group). These will include questions from all versions from 2012 onwards.
- Some chapters **will** include multiple papers due to the large amount of information within the chapter.
- All papers **will** require a calculator.
- You **will** need to use the insert provided in the folder to answer some questions.
- Some questions **will** require you to conduct your own case study on a specific topic.

## Abbreviations

There may be some abbreviations on the papers due to space constraints.
This is what they mean.

| Compiler's Names | |
|---|---|
| **KD** | Kevin D |
| **K** | Kimhan |
| **E** | Elliot |
| **E0** | Eddie |
| **Y** | Yoyo |
| **L** | Leo |
| **J** | Julian |
| **P** | Pauly |
| **M** | Matthieu |

## Mark Schemes

This is an outline of how marks can be handed out and what words mean in the mark scheme.
This is a copy of what is given by Cambridge. This may be used by compilers/examiners.

| Symbol/Word | Meaning |
|---|---|
| **A#** | Answer Mark |
| **M#** | Method Mark |
| **B#** | Independent Mark |
| awrt | Answers which round to |
| cao | Correct Answer Only |

| | |
|---|---|
| dep | Dependent |
| FT | Follow-Through Error |
